E.G. CONSTRUCTION LLC

E.G. Construction LLC, was developed from a family line focused on bettering the Gallatin Valley. Eugene is a fourth generation Bozemanite, and also a third generation to be a developer and builder. He learned at a young age, and a passion for helping young families achieve the American Dream of home ownership brought him back to the Gallatin Valley in 2004.

E.G. Construction LLC's focus is to use materials of the best quality while continuing to keep the home affordable. E.G.C. homes allow young families to apply for a First Time Home Buyers Loan. But the customer service goes beyond price. E.G.C. gets to know clients personally by being involved with them and their home after they have moved in. E.G.C. does not build homes beyond the financial reach of the majority of young families. E.G.C. prides themselves on homebuyers walking through the front door and being able to say, "We can afford this, this can be ours."

“We pride ourselves on housing Bozeman’s working class.”
